

Appln. S.N. 10/699,458  
Prelim. Amdt. dated November 10, 2006 for RCE  
Docket No. 100200584-1

2

In the specification:

Please revise the paragraph at page 7, lines 25-30, as follows:

In an embodiment, imaging the homogeneous suspension 18 patterns the liquid 16 having nanowires 14 therein. It is to be understood that the homogeneous suspension 18 may be patterned into a predetermined configuration depending on the desired end use. By patterning the liquid 16 having nanowires 14 therein using an embodiment of method of the present invention, etching steps may not be required.
